Introducing UV-C Germicidal (bacteria killing) Lamps & Services

***Environmentally
friendly cleaning &
germ killing solutions
for your home &
business!***

Benefits of UV-C disinfection

- Scientifically proven & tested disinfection method since late 1800s.
- Our lamps are guaranteed to kill 99.9% of various pathogenic bacteria including E. Coli, Staphylococcus Aureus, Salmonella & Psuedonomas Aerugonisa & many more.
- Environmentally friendly, effective & efficient way to create a germ free environment for those who are vulnerable to bacteria causing diseases.
- Save time & money. Stop wasting your time scrubbing surfaces using a variety of harsh chemicals!
- Our lamps are easy to operate and require virtually no maintenance.
- Effective way to control mold & fungi.

AND MANY MORE!

www.uvlights.net.au is a subsidiary of GB's Melbourne Cleaners.

- GB's Melbourne Cleaners is an Australian owned & operated cleaning company specialising in domestic, office & commercial cleaning.
- GB's Melbourne Cleaners is also a retailer & wholesaler of germicidal UV-C lights in Australia.
- Our lamps use physical process of disinfection which eliminates the use of harsh chemicals around your home & work environment.
- UV-C germicidal technology is currently used by leading hospitals, hotels & various other industries all over the world.
- Our lamps are sold with a comprehensive 1 year warranty.

What is Germicidal Ultraviolet?

UV-C light is germicidal & deactivates the DNA of bacteria, viruses & other pathogens, thus destroying their ability to multiply & cause disease.

Specifically, UV-C light causes damage to the nucleic acid of microorganisms by forming covalent bonds between certain adjacent bases in the DNA.

The formation of such bonds prevents the DNA from being unzipped for replication, & the organism is unable to reproduce.

In fact, when the organism tries to replicate, it dies!
